

PRODUCTS & SERVICES PORTFOLIO · 2026

Technology for Africa's *next* era.

Artificial Intelligence · Blockchain & Digital Trust · Digital Transformation

Africa Tech Trust at a *glance*.

Africa Tech Trust is the pan-African institution that governments, corporates and partners trust to turn technology ambition into delivered capability. Member-based, African-controlled, independent of any vendor stack. Everything we offer fits in three categories.

01

Artificial Intelligence.

Training, sovereign in-house AI, sector solutions, custom models, agents, strategy and assurance.

7 PRODUCT LINES · PAGES 5-9

02

Blockchain & Digital Trust.

Identity and credentials, registries, traceability, tokenisation, regulation and training.

6 PRODUCT LINES · PAGES 11-12

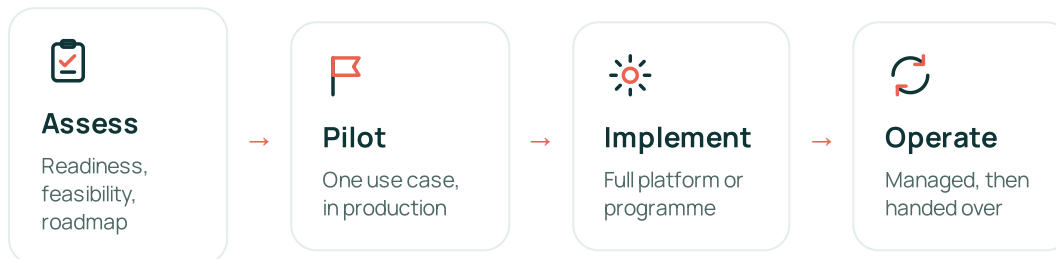

03

Digital Transformation.

Digital government, sector digitalisation, super-apps and platforms, cloud, data, automation, cybersecurity, skills.

9 PRODUCT LINES · PAGES 14-17

HOW EVERY PRODUCT IS DELIVERED

WHAT MAKES ATT DIFFERENT

- We work on the buyer's side, not for a vendor
- Strategy and delivery from one accountable team
- Sovereignty by design: your data, models, infrastructure
- Verified pan-African delivery network
- Capability stays with you: training and handover

Reading guide. Pages 2-3 give the complete offer in summary. Detailed service descriptions follow from page 4, one category at a time.

Let's talk

info@africatechtrust.com

Twenty-two product lines, *one page*.

01 Artificial Intelligence .

 **AI Training Programmes**
Seven audience curricula, 49 modules, certified

 **Sovereign AI**
Your own AI in-house; no data leaves

 **AI Solutions by Sector**
Deployable use cases for eight sectors

 **Custom Language Models**
Domain and African-language models

 **AI Agents & Automation**
Assistants, document intelligence, agents

 **AI Strategy & Consulting**
National and enterprise strategy, roadmap

 **AI Governance & Assurance**
Policy, evaluation, independent audit

02 Blockchain & Digital Trust .

 **Digital Identity & Credentials**
Verifiable certificates, licences and IDs

 **Digital Registries**
Land, company, licence, procurement registries

 **Traceability & Trade Finance**
Provenance, warehouse receipts, invoices

 **Tokenisation & Digital Assets**
Bonds, carbon credits, real-world assets

 **Strategy, Regulation & Feasibility**
Should you, where, under which rules

 **Blockchain Training**
Seven modules, eight audiences, certified

03 Digital Transformation .

 **Digital Government & E-Services**
Portals, DPI, end-to-end service digitalisation

 **Sector Digitalisation**
Health, education, tax, justice, utilities

 **Super-Apps & Digital Platforms**
Continental platforms; flagship: VukaTrade

 **Enterprise Transformation**
Strategy, operating model, transformation office

 **Cloud & Legacy Modernisation**
Migration, sovereign hosting, modernisation

 **Data Platforms & Analytics**
Data strategy, platforms, dashboards

 **Automation, ERP & Systems**
Workflow automation, ERP, integration

 **Cybersecurity & Managed Services**
Security, service design, 24/7 support

Digital Skills & Change

What follows. Each category opens with a divider page, then one page per product line or pair of lines: what it is, what is included, who it is for, and how to start.

Sovereign AI: your own AI, fully *in-house*.

A complete AI capability deployed inside your organisation or government, on your servers or in your national cloud, under your access control. No prompts, documents or data leave to an external provider.

BEST FOR

Ministries, security agencies, central banks, regulators, hospitals, universities, banks

FORMAT

Assessment 6–8 weeks → pilot 12–16 weeks
→ production

ENTRY POINT

Sovereign AI Readiness & Implementation Assessment

Let's talk

info@afriicatechtrust.com

AI Solutions by *Sector.*

Pre-scoped use cases with a known data requirement, a reference architecture and a pilot plan. Deployed into your existing systems, on sovereign or partner infrastructure.

Agriculture.

- Crop and pest detection
- Farmer advisory, local languages

Healthcare.

- Clinical documentation
- Facility stock-out prediction

Education.

- Personalised tutoring
- Assessment and analytics

Finance & Banking.

- Fraud, AML, credit risk
- Onboarding intelligence

Government Services.

- Citizen assistants, all channels
- Permits and licensing triage

Telecommunications.

- Network intelligence
- Churn and revenue assurance

Energy & Utilities.

- Demand and grid forecasting
- Billing and revenue protection

Trade & Customs.

- Customs risk targeting
- Port and route optimisation

BEST FOR

Ministries, agencies, banks, telecoms, utilities, agribusiness, logistics

FORMAT

12–16 week Pilot-to-Production per use case
→ rollout → managed

ENTRY POINT

Use-Case Discovery Workshop, 2 days

Let's talk

info@afriicatechtrust.com

Custom Models & AI *Agents*.

PRODUCT LINE 4

文A Custom Language Models.

African-language and domain models, built for one domain or one language, trained on your data, proven on your tasks.

- Domain models: tax, customs, health, banking, legal
- Institutional model trained on your own records
- African-language text, speech and translation models
- Small, efficient models for mobile and offline use
- Curated, licensed datasets and evaluation suites
- Bias, safety and robustness testing

Best for ministries with large document estates, regulators, banks, telecoms, language institutions.

Entry point Model Feasibility & Data Assessment, 4 weeks.

PRODUCT LINE 5

AI Agents & Automation.

Assistants, knowledge systems and agents that do work inside your systems, with human sign-off where it matters.

- Institutional knowledge assistant for staff
- Citizen assistant: web, WhatsApp, SMS, USSD, voice
- Document intelligence: classify, extract, validate
- Agentic workflows with human control points
- Integration with ERP, CRM, records, e-government
- Guardrails, access control, escalation and audit

Best for revenue and registry authorities, banks, insurers, telecoms, utilities, hospitals.

Entry point Use-Case Discovery Workshop, 2 days.

Let's talk

info@africatechtrust.com

www.africatechtrust.com

AI Strategy & AI *Assurance*.

PRODUCT LINE 6

AI Strategy & Consulting.

For governments and enterprises. The decisions before the technology: where AI creates value, what it costs, how it is governed, in what order to build.

- National AI strategy and policy, AU-aligned
- National and enterprise AI readiness assessment
- AI unit and institution design
- Use-case portfolio ranked by value, cost and risk
- Investment case, funding route and roadmap
- Procurement framework and vendor evaluation

Best for ministries, national digital agencies, regulators, DFIs, boards and executive teams.

Entry point AI Readiness Assessment, 6–8 weeks.

PRODUCT LINE 7

AI Governance, Evaluation & Assurance.

Independent of any vendor. We write the rules, test whether systems meet them, and certify the result.

- AI policy and responsible-AI framework
- Risk classification and approval process
- Model testing on your tasks and languages
- Vendor and tender evaluation against the bid
- Regulatory sandbox design for regulators
- Pre-deployment audit and ATT assurance statement

Best for regulators, ministries, central banks, DFIs and boards accountable for AI systems.

Entry point AI Governance Gap Assessment, 3 weeks.

CATEGORY 02

Blockchain & Digital *Trust.*

Digital Identity & Credentials

Digital Registries

Traceability & Trade Finance

Tokenisation & Digital Assets

Strategy, Regulation & Feasibility

Blockchain Training

Digital Identity & Digital *Registries*.

Blockchain where it creates institutional trust: verification, identity and records. We tell you when a database is the better answer.

PRODUCT LINE 1

Digital Identity & Credentials.

Verifiable credentials anyone can verify in seconds and no one can forge. Open standards, owned by the issuer.

- Credential issuance platform for institutions
- National or institutional digital ID layer
- Public and API verification service
- Official document authentication
- Cross-border credential recognition
- Identity wallet with consent management

Best for ministries of education, health, labour, interior · universities · professional councils · licensing bodies.

Entry point Credential Pilot: one issuer, one credential type, 12 weeks.

PRODUCT LINE 2

Digital Registries.

Public-sector registries whose every change is recorded, attributable and auditable, on infrastructure you control.

- Land and property: titles, transfers, encumbrances
- Company registry and beneficial ownership
- Vehicle, licence and permit registries
- Procurement and contract registry
- Public finance and disbursement tracking
- Migration, workflow redesign and e-services

Best for land, company and transport ministries · registrars-general · procurement authorities · treasuries.

Entry point Registry Feasibility & Readiness Study, 6 weeks.

Let's talk

info@afriicatechtrust.com

www.afriicatechtrust.com

Trade, Assets, Regulation & *Training.*

PRODUCT LINE 3

Traceability & Trade Finance.

- Farm-to-export traceability and export compliance
- Mineral and resource chain of custody
- Electronic warehouse receipts as collateral
- Tokenised invoices and cross-border settlement

Entry point traceability pilot on one value chain, 16 weeks

PRODUCT LINE 5

Strategy, Regulation & Feasibility.

- Feasibility assessment; an honest no is a deliverable
- National and institutional blockchain strategy
- Regulatory framework: VASP licensing, KYC/AML
- Platform selection and multi-party governance

Entry point Feasibility Study, 4–6 weeks

All digital-asset work is designed within the applicable regulatory framework. ATT does not issue, trade or promote cryptocurrencies.

PRODUCT LINE 4

Tokenisation & Digital Assets.

- Tokenised government and municipal bonds
- Carbon-credit tokenisation and registries
- Real-world assets: land, gold, infrastructure
- CBDC and stablecoin sandboxes; VASP supervision

Entry point tokenisation feasibility and regulatory study, 6 weeks

PRODUCT LINE 6

Blockchain Training & Certification.

- M0 Foundations · M1 Payments · M2 Tokenisation
- M3 Smart Contracts · M4 Regulation · M5 Treasury · M6 Security
- Executive, government, professional, developer tracks
- In-person, online, in-language; ATT-certified

Entry point executive briefing or dedicated cohort

CATEGORY 03

Digital *Transformation.*

Digital Government

Sector Digitalisation

Super-Apps & Platforms

Enterprise Transformation

Cloud & Modernisation

Data & Analytics

Automation & ERP

Cybersecurity & Managed Services

Digital Skills & Change

Digital *Government* & Public Service Digitalisation.

Move public services from counters and paper to secure digital channels, and rebuild the back office so the service is fast because the process is.

E-services platform.

- Portal, mobile app, USSD, assisted channels
- Single sign-on for citizens and business

Digital Public Infrastructure.

- Digital ID, payments, data exchange
- Interoperability layer across agencies

Service digitalisation.

- Permits, licences, certificates, benefits
- Tax and revenue services, end to end

Government architecture.

- Standards and shared services
- Integration with registries and payments

Digital government strategy.

- National, ministry or city level
- Service prioritisation and roadmap

Smart city platforms.

- Urban services and revenue
- Planning and citizen engagement

BEST FOR

National digital agencies, ICT and line ministries, revenue authorities, cities

FORMAT

Strategy 8–12 weeks · programme 6–18 months · managed service

ENTRY POINT

Digital Government Readiness & Service Prioritisation, 6 weeks

Let's talk

info@afriicatechtrust.com

Sector Digitalisation *Programmes.*

End-to-end digitalisation of one sector: strategy, systems, data, skills and governance. A multi-year programme with an ATT programme office and local partner build.

Health.

- Electronic health records
- Health information exchange

Education.

- Learning and student systems
- Examination and credentials

Agriculture.

- Farmer registries, e-extension
- Digital subsidies, e-vouchers

Justice & Safety.

- E-filing and case management
- Digital evidence and records

Tax & Revenue.

- E-filing, e-payment, e-invoicing
- Customs and single window

Transport & Cities.

- Digital licensing and vehicles
- Transport and fare systems

Energy & Water.

- Smart metering and billing
- Asset and outage management

Financial Inclusion.

- Digital payment integration
- Digital social transfers

BEST FOR

Line ministries, sector agencies, DFI and donor programmes, regional bodies

FORMAT

Sector Digital Assessment 8 weeks → programme design → phased delivery

ENTRY POINT

Sector Digital Assessment, 8 weeks

Let's talk

info@afriicatechtrust.com

Super-Apps & Digital Platforms.

One application, many services: identity, payments, marketplace, logistics and compliance on a single platform, built on sovereign infrastructure and designed to operate across borders.

Identity & onboarding.

- Verified suppliers, buyers, investors
- KYC, KYB and trust tiers

Wallet & payments.

- Multi-currency, mobile money, cards
- Escrow and cross-border settlement

Marketplace & discovery.

- Catalogue, RFQ and matching
- Investment and project listings

Logistics & fulfilment.

- Freight, customs and tracking
- Warehouse receipts and insurance

Compliance & certification.

- Rules of origin, standards, permits
- Supplier maturity certification

Data & intelligence.

- Trade flows, prices, risk
- Investor and market analytics

FLAGSHIP PLATFORM PROGRAMME

VukaTrade.

A pan-African trade and investment super-app: verified suppliers, buyers and investors on one platform.

- Cross-border marketplace and investment listings
- Verified supplier tiers and certification
- Payments, escrow and trade finance built in
- Customs, logistics and rules of origin

PROGRAMME AMBITION

+35% Africa's GDP growth within five years

Jobs Decent jobs across trade value chains

Context: the World Bank (2020) estimates full AfCFTA implementation could raise Africa's income by 7% (\$450bn) and intra-African exports by 81% by 2035. Digital trade platforms are the facilitation layer those gains depend on.

BEST FOR

AfCFTA bodies, regional economic communities, trade ministries, DFIs, industry associations

FORMAT

Platform design 8–12 weeks → MVP 6–9 months → national and regional rollout

ENTRY POINT

Platform Feasibility & Design Sprint, 8 weeks

Let's talk

info@afriicatechtrust.com

Enterprise Transformation *Services.*

Six service lines for enterprises and institutions modernising how they operate. Each is available standalone or inside a transformation programme.

Enterprise Transformation.

- Digital strategy and business case
- Target operating model
- Transformation office and governance
- Product and agile delivery model

Cloud & Legacy Modernisation.

- Cloud strategy, sovereign hosting
- Migration and cost optimisation
- Application modernisation
- API and integration platform

Data Platforms & Analytics.

- Data strategy and governance
- Enterprise and national data platforms
- Dashboards and self-service BI
- Advanced analytics and forecasting

Automation, ERP & Systems.

- Process mapping and re-engineering
- Workflow automation and RPA
- ERP, CRM and HRMS implementation
- Systems integration

Cybersecurity & Managed Services.

- Security strategy and compliance
- Security testing and operations centre
- Digital service design and engineering
- 24/7 support and managed services

Digital Skills & Change.

- Workforce digital skills assessment
- Role-based skills curricula
- Change management and adoption
- Certification through ATT Academy

Talk to our team

www.afriicatechtrust.com

Six engagement *models.*

Every product in this portfolio is bought through one of six models. Each has a defined scope, a named ATT lead, milestone-based delivery and a defined handover.

Assessment & Advisory.

3–12 weeks. Readiness, feasibility, strategy, governance. Ends in a decision and a roadmap.

Pilot-to-Production.

12–24 weeks. One use case or service, built, integrated, evaluated, in production.

Implementation Programme.

6–36 months. Full platform, registry, service or sector programme, milestone-based.

Managed Capability.

Recurring service. ATT operates and improves the system; your team takes over on schedule.

Training & Certification.

Open cohorts, dedicated cohorts, in-house programmes and train-the-trainer.

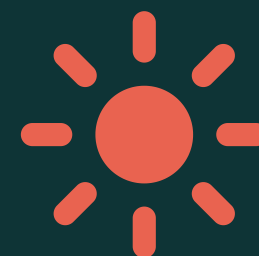

Partnership & Consortium.

Joint delivery with DFIs, multilaterals, universities and industry; multi-country programmes.

Let's talk
